SUMMARY

Computer Science undergraduate experienced in building AI-driven applications and predictive models using Python and modern frameworks. Passionate about applying data-driven solutions to technology domains.

PROJECT

Capital Compass AI – Financial Decision Assistant

github.com/nakkadharanigoud/Capital-Compass-AI.git • January 2026 – February 2026

- Developed an AI-powered financial guidance system using LangGraph and Retrieval-Augmented Generation (RAG), delivering personalized recommendations with **~85–90% response relevance**.
- Built a context-aware pipeline that processes **100+ user queries per session**, improving response accuracy and reducing irrelevant outputs by **~30%**.
- Integrated large language models with backend services to generate real-time recommendations in **<2 seconds**, enhancing user experience.
- Designed scalable workflows supporting **multiple concurrent users (20–50 sessions)** while maintaining low latency and consistent performance.

Student Classroom Prediction System

github.com/nakkadharanigoud/smart_classroom_predictor.git • January 2026 – February 2026

- Created and deployed a machine learning solution in Python to predict available classrooms, improving scheduling efficiency by **~25–30%** using historical data.
- Cleaned and prepared **10,000+ records**, increasing data quality and improving model accuracy by **~20%**.
- Identified usage patterns across **50+ classrooms**, reducing space conflicts and improving utilization by **~15%**.
- Built a real-time prediction system that processes new data in **<2 seconds**, enabling faster and more reliable classroom allocation.

EDUCATION

B.Tech, Computer Science and Engineering

Vignan Institute of Technology and Science • 2023 – 2027

- CGPA 8.93.

Intermediate (MPC)

Sri Gayatri Junior College • 2021 – 2023

- 91.6%

SSC (10th Grade)

Janapriya High School • 2021

- 10/10.

CERTIFICATIONS

Python Certification

Cisco

Computer Science Fundamentals

NPTEL

Data Analytics

Deloitte

Data visualization

Tableau

AI & Machine Learning

Analytics Vidhya

SKILLS

Languages: Python, C

Databases: MySQL, Oracle Structured Query Language

Data Visualization: Tableau

Technologies: HTML, CSS

Git, Jupyter Notebook, VS Code
