PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong foundation in Python and Machine Learning. Experienced in developing AI-powered applications and predictive models. Seeking to leverage skills in software development and data analysis to drive innovative solutions in a dynamic tech environment.

EDUCATION

Bachelor of Technology, Computer Science and Engineering Vignan Institute of Technology and Science	2023 – 2027
Intermediate Sri Gayatri Junior College GPA: 91.6%	2021 – 2023
Secondary School Certificate Janapriya High School GPA: 10/10	2021 – 2021

PROJECTS

Capital Compass AI – Financial Decision Assistant Developed an AI-powered financial guidance system using LangGraph and Retrieval-Augmented Generation (RAG), delivering personalized recommendations with ~85–90% response relevance. Built a context-aware pipeline that processes 100+ user queries per session, improving response accuracy and reducing irrelevant outputs by ~30%. Integrated large language models with backend services to generate real-time recommendations in <2 seconds, enhancing user experience. Designed scalable workflows supporting multiple concurrent users (20–50 sessions) while maintaining low latency and consistent performance.	Jan 2026 – Feb 2026
Student Classroom Prediction System Created and deployed a machine learning solution in Python to predict available classrooms, improving scheduling efficiency by ~25–30% using historical data. Cleaned and prepared 10,000+ records, increasing data quality and improving model accuracy by ~20%. Identified usage patterns across 50+ classrooms, reducing space conflicts and improving utilization by ~15%. Built a real-time prediction system that processes new data in <2 seconds, enabling faster and more reliable classroom allocation.	Jan 2026 – Feb 2026

Achievements

- ServiceNow Certified System Administrator (CSA) • Maintained CGPA of 8.93/10 in B.Tech CSE • Completed JPMorgan Chase Software Engineering Job Simulation • Completed Deloitte Data Analytics Job Simulation
